## About me

---

I am a student based in London who has finished his first year doing Software Engineering (BEng) in the University of Westminster, and I am currently looking for work to enhance my skills. I was also a form rep previously which was crucial in the development of my confidence and communication skills. Since my break started I have been developing my own website (<https://web-portfolio-orpin-nu.vercel.app/>) to keep myself occupied.

I have really enjoyed programming and I am looking to further my skills. So far I have been using the odin project as I realise my ability to show my skills through the use of a GUI will be key.

## Education

---

### Langdon Academy | 2016-2021

11 GCSEs Grades 8-4 including English Language (7), Maths (7), Computer Science (8)

### Newham Sixth Form College | 2021-2023

A Levels in Economics - C, Psychology - C and Computer Science - D

### University Of Westminster | (2023-2026)

Bachelor of Engineering (BEng) Degree in Software Engineering - First year average score = 72%

#### **First Year Relevant Modules**

Software Development 1 (Python - Python IDE), Software Development 2 (Java - NetBeans IDE), Web design and development (HTML/CSS/JS - VSCode).

#### **Second Year Relevant Modules**

N/A

#### **Third Year Relevant Modules**

N/A

## Relevant Projects

---

Vercel Link for websites : <https://vercel.com/m0ravats-projects>

GitHub : <https://github.com/m0ravat>

### Web Portfolio (April 2024 - Current)

Tools/Languages used : HTML/CSS/JS, VS Code, Vercel.

**Description:** I created a personal website to develop my web design skills and showcase them in a way that will appeal to employers while being able to show them other projects.

**Relevant Links :** Direct Link (<https://web-portfolio-orpin-nu.vercel.app/>), GitHub (<https://github.com/m0ravat/webPortfolio>), Project description link (<https://web-portfolio-orpin-nu.vercel.app/Projects/portfolio.html>)

### Module intake Program (June 2024 - June 2024)

Tools/Languages used : Java, IntelliJ IDE.

**Description :** I used OOP principles and created 3 classes for the purpose of creating multiple modules students can enrol in by booking their seat, also being able to choose their class.

**Relevant Links :** GitHub (<https://github.com/m0ravat/Enrol>)

### **Calculator App (June 2024 - June 2024)**

**Tools/Languages used :** HTML/CSS/JS, VS Code, Vercel

**Description :** I created a basic 2 part calculator application for the purpose of developing my web development skills and putting more thought into the process of designing a GUI and manipulating it from the backend.

**Relevant Links :** Direct Link (<https://calculator-murex-omega.vercel.app/>), GitHub (<https://github.com/mOravat/Calculator>), Project description link (<https://web-portfolio-orpin-nu.vercel.app/Projects/calc.html>).

## **Work Related Experience**

---

### **Form Representative | Langdon Academy (Duration : 1 Academic Year)**

#### **Role description**

Collaborating with another form representative to find ways of improving the school life for the students in our class and helping to turn them into reality. Also attending regular meetings and becoming a point of contact for students should they need support.

#### **Skills gained/developed**

Communication skills, punctuality, proactiveness, friendly demeanour.
