About me

I am a student based in East London who has finished his first year doing Software Engineering (BEng) in the university of Westminster, and I am currently looking for work to enhance my skills. I was also a form rep previously which was crucial in the development of my confidence and communication skills. Since my break started I have been developing my own website (<https://web-portfolio-orphin-nu.vercel.app/>) to keep myself occupied.

Due to the nature of my studies I am available for part time work all year round, and can carry out full time work until mid September.

Key Skills

- **Communicating within a team** - I was part of a student council with 20+ other form representatives and multiple teachers.
- **Punctual** - I boasted a near perfect punctuality and 90%+ attendance score throughout education which allowed me to get into university.
- **Time management skills** - I had to balance 3 university level courseworks and 1 test during Ramadan where I had to fast throughout the whole day and wake up at 3am for breakfast.
- **Proactive mindset** - I reached out to students for their opinions on the school during my time as a form representative.
- **Leadership** - I was part of a group project where I was key in making sure everyone knew what to do and I had a template set up for everyone.
- **Resilience** - I overcame adversity from being part of a minority group and becoming the 1st person to go to university from within my family.

Work Related Experience
